EDUCATION

Master's in Computer Science	May 2027
Arizona State University, Tempe, AZ	3.89 GPA
B.E., Computer Science	Aug 2022
Visvesvaraya Technological University, India	3.69 GPA

TECHNICAL SKILLS

Python, SQL, Java, JavaScript, Power BI, Tableau, Advanced Excel, Power Automate, PostgreSQL, Kafka, React, Node.js, D3.js, ETL Pipelines, Data Modeling, Data Cleaning, Data Validation, Data Visualization, KPI Reporting, Statistical Analysis, Regression Analysis, Trend Analysis, Business Analytics, Process Improvement, Quality Analytics, Semantic Analysis, RAG

WORK EXPERIENCE

Data Analyst – Social Embeddedness, Arizona State University (Tempe, Arizona) May 2026 – Present

- Built and maintained a Python ETL pipeline to transform raw Collaboratory exports into Tableau-ready clean tables, bridge tables, validation reports, and archived refreshes
- Modeled activity, organization, profile, unit, and course data into relational datasets for Social Embeddedness reporting, interactive dashboards, and visualizations
- Created Tableau dashboards and data model guidance to support stakeholder reporting, program analysis, and repeatable refresh workflows
- Supported Collaboratory data collection, maintenance, and training by documenting data definitions, quality checks, and reporting processes

Business Process Quality and Improvement - Associate, Hitachi Digital Services (Bengaluru, India) Aug 2022 – Aug 2025

- Designed QEI frameworks, Power BI dashboards, and KPI reports to evaluate process health, improving operational efficiency by 30%
- Conducted Global Internal Quality Audits and analyzed audit data to identify process gaps, improve operations by 40%, and reduce errors by 20%
- Applied regression and trend analysis to predict non-compliance patterns and support proactive audit and compliance decisions
- Supported CMMI Level 3 and ISO audits, automated reporting workflows with Power Automate, and prepared executive reports for India and Japan leadership

Data Science Intern, Indian Institute of Science (Bengaluru, India) Jan 2022 – Jul 2022

- Developed a ball-tracking application using smartphone video capture and annotated datasets for machine learning model training
- Cleaned, validated, and preprocessed motion datasets to improve data consistency and model reliability
- Conducted exploratory data analysis on trajectory data and built visualizations using Python, Matplotlib, and Seaborn
- Documented methodology, findings, and recommendations for research stakeholders to improve tracking model performance

PROJECTS

QEI Observability & Analytics Platform | Python, SQL, React

- Built dashboards and backend pipelines to monitor KPIs, data quality, and anomalies
- Designed SQL models and reusable Python modules for scalable reporting and drill-down analysis

Automation & Integration Services | Python, REST APIs

- Built REST API services to process events and automate operational workflows
- Added request validation, retry logic, structured logging, and unit tests to improve reliability

ACHIEVEMENTS

HV Pinnacle Awards: The Transformers Q1 FY2023-24, Global Quality Centre of Excellence - Certificate of Achievement, Silver Awards - HV Pinnacle: The Rookie Star Q3 FY2023-24, Hitachi: People Champion 2022-23, 2023-24, and 2024-25
